

Electrify America Opening First California EV Fast Charging Station in Torrance; Company Targeting to Complete Construction on Nine Charging Stations in California by Year-End

More than 600 electric vehicle chargers at approximately 160 charging stations to be installed by June 2019 in California

Pasadena, CA (Nov. 13, 2018) – The Country Hills Shopping Plaza in Torrance, California will be the first DC fast charging station to open in the state as part of Electrify America’s plan to install approximately 160 charging stations in California by June 2019.

“The Country Hills station in Torrance is a great first step as we start to quicken the pace of construction and make more stations available to the public,” said Brendan Jones, chief operating officer of Electrify America. “The fast chargers that we are installing have the capability to charge an EV up to 20 miles of range a minute to a vehicle. Providing this kind of range confidence can be a game-changer in accelerating ZEV adoption in the U.S.”

Through its Cycle 1 California ZEV Investment Plan, Electrify America is developing a network of electric vehicle charging stations along highly traveled highways and in six California metropolitan areas which include Fresno, Los Angeles, Sacramento, San Diego, San Francisco and San Jose. Target locations or “target zones” for each station were identified using Electrify America’s proprietary station siting methodology, which projected the locations where DC fast charging stations will be most needed by 2020.

The planned network in California will consist of more than 600 DC fast charging dispensers at approximately 160 charging station sites. In addition, Electrify America will build approximately 1,500 charging stations featuring Level 2 chargers at workplaces and multiunit dwellings in its six metropolitan markets. The network will deploy cutting-edge technology to deliver customer-centric charging to consumers safely and conveniently, and it will connect California to the Electrify America national network connecting 42 other states.

The first California locations for Electrify America’s fast charging stations are:

- **Country Hill Shopping Plaza, 2965 Rolling Hills, Torrance, CA.**
- **Montebello Plaza, 2401 W. Via Campo, Montebello, CA**
- **Walmart Supercenter, 8465 Elk Grove Blvd., Elk Grove, CA**
- **Novato Fair Shopping Center, 900 Diablo Ave., Novato, CA**
- **Livermore-San Francisco Premium Outlets, 2774 Livermore Outlets Dr., Livermore, CA**
- **Madera-Walmart, 1977 W. Cleveland Ave., Madera, CA**
- **Laguna, Village, 8785 Center Parkway, Sacramento, CA**
- **La Mirada, 14900 La Mirada Blvd., La Mirada, CA**
- **America’s Best Value Inn, 3930 County Rd. 89, Dunnigan, CA**

EV owners are encouraged to check the Electrify America website to confirm when these California stations are open for charging. The locator map can be found on the company's website or at the following link [Electrify America Charging Stations Locator](#).

Electrify America's nationwide DC fast charging stations will be located along high-traffic corridors in 42 states, including two cross-country routes. Locations will accommodate between four and ten chargers, with charging power levels up to 350kW available, capable of adding up to 20 miles of range per minute to a vehicle. Nationally, each planned charging station site will be located no more than 120 miles apart and, on major East and West Coast highways, planned locations average only 70 miles apart. Within California, average distance between stations is projected to be 48 miles.

About Electrify America

Electrify America LLC, a wholly-owned subsidiary of Volkswagen Group of America headquartered in Reston, VA and with an office in Pasadena, CA, is investing \$2 billion over 10 years in Zero Emission Vehicle (ZEV) infrastructure, education and access. The investment will enable millions of Americans to discover the benefits of electric driving and support the build-out of a nationwide network of workplace, community and highway chargers that are convenient and reliable.
